## Section 4: First aid measures

### Description of first aid measures

Inhalation Move to fresh air. If breathing stops, provide artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.

Skin contact	Remove contaminated clothing. Wash the skin immediately with soap and water. Get medical attention if irritation develops and persists. Wash clothing separately before reuse.
Eye contact	Flush thoroughly with water for at least 15 minutes. Get medical assistance.
Ingestion	Never give anything by mouth to a victim who is unconscious or is having convulsions. Get medical attention immediately. If swallowed, do NOT induce vomiting.
Most important symptoms and effects, both acute and delayed	Not available.
Indication of any immediate medical attention and special treatment needed	Not available.

## Section 5: Firefighting measures

General fire hazards	Not available.
Extinguishing media	
Suitable extinguishing media	Water fog.  Small Fires: Carbon dioxide (CO <sub>2</sub> ). Dry chemicals.  Large Fires: Foam.
Unsuitable extinguishing media	Water. Water may be ineffective. Do not use water jet as an extinguisher, as this will spread the fire.
Special hazards arising from the substance or mixture	vapours may travel to a source of ignition and flash back.  Will decompose at temperatures exceeding 177°C. Thermal decomposition or combustion may liberate carbon oxides and other toxic gases or vapours.
Advice for firefighters Special protective equipment for firefighters	Wear self-contained breathing apparatus and protective clothing.
Special firefighting procedures	Move containers from fire area if you can do so without risk. Cool containers with flooding quantities of water until well after fire is out.

## Section 6: Accidental release measures

Personal precautions, protective equipment and emergency procedures	
For non-emergency personnel	Keep unnecessary personnel away. Local authorities should be advised if significant spillages cannot be contained. Wear suitable protective clothing. Wear appropriate personal protective equipment.  If mist is generated (heating, spraying) and engineering controls are not sufficient, wear approved organic vapor respirator suitable for oil mist. If ventilation is not sufficient to effectively prevent buildup of aerosols or mists, appropriate NIOSH/MSHA respiratory protection must be provided.
For emergency responders	Not available.
Environmental precautions	Keep run-off water out of sewers and water sources. Dike for water control. Dike the spilled material, where this is possible. Avoid discharge into drains, water courses or onto the ground.
Methods and material for containment and cleaning up	Extinguish all flames in the vicinity. Eliminate sources of ignition.  Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Cover with plastic sheet to prevent spreading. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Following product recovery, flush area with water.  Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.  Never return spills in original containers for re-use. For waste disposal, see section 13. Ventilate the area.
Reference to other sections	Not available.

## Section 7: Handling and storage

Precautions for safe handling	Use spark-proof tools and explosion-proof equipment. Ground and bond containers when transferring material. Avoid contact with skin and eyes. Avoid contact with clothing. Wash thoroughly after handling. Handle in accordance with good industrial hygiene and safety practices. "Empty" containers retain product residue (liquid or vapour) and can be dangerous. Follow all MSDS/label precautions even after container is emptied because they may retain product residues. Avoid heat, sparks, open flames and other ignition sources. Keep away from heat and sources of ignition.
Conditions for safe storage, including any incompatibilities	Carbon steel. Aluminium. Stainless steel. Keep away from heat, sparks, and flame. Store in a closed container away from incompatible materials. Store in a cool, dry place.
Specific end use(s)	Not available.
